

Gain More Time for Them.

By Us Saving Time for You.

We help your teams focus on the work that matters.

Staffing capacity and turnover are two of the most critical challenges in child welfare. Our automated assistants directly address these issues – allowing your staff to spend less time on paperwork and more time saving children.

Our virtual assistants automated boring and repetitive work at ChildNet, reducing a 5-hour Foster Care Licensing Process to 5 minutes. This decreased processing costs by 97%.

Our assistants read thousands of documents, classify over 160 types of documents, determine which case they belong to, and then post them to the appropriate storage location. This ensures timely and accurate document processing while saving over 20,000 staff hours per year in a single local agency.

You Manage The Business, We Manage The Technology

You don't need to "speak robot" to use our automations. We provide everything you will need to get them working, and keep them working. In fact, some people tell us it is easier to "hire" an automated assistant than to hire a new person.

Save Time And Effort

Our assistants act like "super fast users", but don't get frustrated when the system is slow. They're happy as long as they are saving people from having to do the manual tasks. They work 24-7 and don't mind being woken up in the middle of the night.

Elevate Your Employees' Experience

Freeing employees from boring repetitive tasks, frees them to do more fulfilling work, reduces frustration and turnover. These assistants can work independently but with accountability, in effect, your employees are elevated to a supervisory roll.

Ensure Compliance

Our assistants work within your existing application and security controls. In fact, they improve compliance because they consistently follow your quality procedures (they never take shortcuts). And they document every step they take in case to support subsequent reviews or statistical analysis.

Improve Stakeholder Experiences

With assistants handling clerical tasks, resources are freed to focus on more critical tasks. Assistants can also be used to perform support tasks which never get the attention they deserve (i.e. setting up stakeholder meetings).

Child Welfare Automations from Boundaryless

Here is just a partial list of work our assistants can help you with:

- ✓ **Licensing (Binti-connector)**
Support activities needed to process foster care licensing documents.
- ✓ **Document Management**
Makes sure documents get stored to proper location(s).
- ✓ **Initial Quality Assessments**
Perform high level quality reviews of related case documents (miniature CSFR).
- ✓ **Data wrangling**
Automate prep work data analysts typically do to collect, analyze, and generate reports.
- ✓ **On/Off- Boarding**
Background checks, user setup, hardware provisioning and corresponding off-boarding activities.
- ✓ **Eligibility Determination**
Validation of household eligibility for federal, state, and local programs.
- ✓ **Revenue Maximization**
Analyze potential sources of payment to ensure agency is "Payer of Last Resort".
- ✓ **Contract Reconciliation**
Validates invoices fall within contract parameters and budget constraints.

And Many More!

Grants 4 Good

Our goal is to maximize the impact of the good we do. Boundaryless can provide credits/funding if your agency has an idea which could provide significant ROI, or be used by many others in the community, We also can provide credits if your agency documents it's ROI after implementation or your solution is adopted by others in the community.
